Put your canola & pulse fields to rest in the best possible condition this fall so you can get ahead in your cereals next spring.

WHY APPLY FALL PRE-SEED?

- **Save time.** Get ahead of your cereal crop and unpredictable weather next spring. Reduce your workload now.
- **Hits harder.** Superior control of winter annuals and broadleaf weeds ahead of barley, oats, durum wheat and spring wheat crops.
- **Extended Control.** All solutions provide SoilActive extended control of many key weeds
- **Flexibility.** Exceptional control under variable weather conditions and application timing.
- **Multi-modes of action.** Two active ingredients deliver overlapping control of key weeds for superior resistance management.

SPRAY THIS FALL, CONTROL WEEDS NEXT SPRING

Apply fall pre-seed solutions anytime from harvest until freeze-up for superior control of broadleaf weeds and winter annuals, including: volunteer Liberty Link® and RoundUp Ready® canola, dandelion, narrow-leaved hawk's-beard, cleavers, buckwheat, chickweed, stinkweed and more. Better manage time, weeds and yield by getting a head start this fall.

FALL WEED CONTROL

Winter annual weeds like narrow-leaved hawk's-beard, flixweed, cleavers and shepherd's-purse are hard to control in the spring with glyphosate alone, because they are too big. Dandelion control is most effective after the first fall frost. A fall pre-seed application is the best way to control these winter annual weeds.

Dandelion

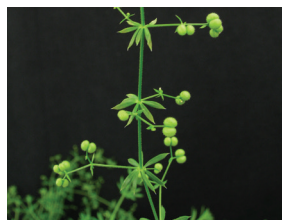

Scentless Chamomile

Flixweed

Narrow-leaved hawk's beard

Cleavers

Shepherd's-purse

LEAVE NOTHING BEHIND.

Dow AgroSciences has a full line of high-performing cereal pre-seed solutions which combine the best broad-spectrum weed control with resistance management and SoilActive™ technology.

- **Paradigm for pre-seed** delivers the most powerful control ahead of wheat and barley, including Group 2 resistant cleavers and hemp-nettle. Just GO on big or small weeds, in wet or cool conditions.
- **Korrex II** provides excellent control of the toughest weeds including all kochia (Group 2 and 9 resistant), dandelion, narrow-leaved hawk's-beard and Canada Thistle. Now available in a convenient NEW pack size.
- **PrePass XC** is a complete solution which controls annual and perennial broadleaf weeds and grasses with SoilActive control. Glyphosate included.
- **PrePass FLEX** provides the same performance and SoilActive control as PrePass XC plus the flexibility to mix with any glyphosate.
