

## **DOWDUPONT™ AGRICULTURE DIVISION TO BECOME CORTEVA AGRISCIENCE™ AS IT PROGRESSES TOWARD BECOMING A STAND-ALONE COMPANY**

*Corteva Agriscience™ Embodies the Company's Purpose of Enriching the Lives of Those Who Produce and Those Who Consume, Ensuring Progress for Generations to Come*

**WILMINGTON, Del.**, Feb. 26, 2018 – The Agriculture Division of DowDuPont™ (NYSE: DWDP) today announced the name of the intended company once it is spun-off, which is expected to happen by June 1, 2019. The intended Agriculture company will become Corteva Agriscience™ (kohr-'teh-vah), which is derived from a combination of words meaning “heart” and “nature”.

“This is the start of an exciting journey,” said James C. Collins, Jr., chief operating officer, Agriculture Division of DowDuPont. “Corteva Agriscience™ is bringing together three businesses with deep connections and dedication to generations of farmers. Our new name acknowledges our history while looking forward to our commitment to enhancing farmer productivity as well as the health and well-being of the consumers they serve. With the most balanced portfolio of products in the industry, nearly a century of agronomic expertise and an unparalleled innovation engine, Corteva Agriscience™ will become a leading Agriculture company, focused on working together with the entire food system to produce a secure supply of healthy food.”

Corteva Agriscience™ brings together DuPont Crop Protection, DuPont Pioneer and Dow AgroSciences to create a market-shaping, standalone agriculture company with leading positions in Seed Technologies, Crop Protection and Digital Agriculture.

The intended company has developed some of the best talent, technology, innovation and R&D capabilities that will uniquely position it to transform our food system by helping farmers grow better, abundant and healthier crops while using fewer natural resources.

“We will continue to invest in some of the most recognized and premium brands in agriculture: Pioneer®, Mycogen®, and the newly launched Brevant™ seed brands, as well as our award-winning Crop Protection products, such as Aproach® Prima fungicide and Quelex™ herbicide with Arylex™ active, while bringing new products to market through our solid pipeline of active chemistry and technologies,” said Collins.

In addition to announcing the corporate name, the intended Agriculture company unveiled the Corteva Agriscience™ brand identity and logo today ([www.corteva.com](http://www.corteva.com)) at Commodity Classic, the largest farmer-led convention and trade show in the United States.

The corporate headquarters for the intended company will be located in Wilmington, Delaware, and will include key corporate support functions. Sites in Johnston, Iowa, and Indianapolis, Indiana, will serve as Global Business Centers, with leadership of business lines, business

support functions, R&D, global supply chain, and sales and marketing capabilities concentrated in the two Midwest locations.

DowDuPont will support the new brand name through a series of recognition events between now and the time the division becomes an independent company.

**About DowDuPont**

DowDuPont (NYSE: DWDP) is a holding company comprised of The Dow Chemical Company and DuPont with the intent to form strong, independent, publicly traded companies in agriculture, materials science and specialty products sectors that will lead their respective industries through productive, science-based innovation to meet the needs of customers and help solve global challenges.
